

PRESS RELEASE

Scotland is set for a staycation summer. Find the top hotspots with...

cool camping: scotland second edition

Scotland has seen a huge increase in visitors since the 'staycation' boom, as we seek out maximum experience for minimum cost. This year, independent-minded staycationers can get a brand new guide to help them find some undiscovered camping gems with the new edition of *Cool Camping: Scotland*.

This 100% updated edition covers a handpicked selection of Scotland's 50 best campsites, including 20 brand new sites. It offers a stunning photographic journey through this inspiring country, with a host of new sites that exemplify the free-spirited sense of adventure that Cool Camping is all about. Think... tranquil loch-side campsites, stunning mountain views, plus some truly remote island camping experiences.

New discoveries in this edition include: an oasis tucked within the volcanic landscape of the Isle of Harris, a beach-side spot looking out onto the lagoonish waters off the Isle of Lewis and woodland camping with deer in the hills of the Cowal peninsula.

You certainly won't be stuck for ideas about what to do when you get there. Scotland is home to some of the most breathtaking scenery in the world, so this edition features the essential walks for hardened hikers: from the infamous West Highland Way, to the gruelling Five-Degree West Challenge. But there's much more to Scotland than the great outdoors, so we've also got pick of the best festivals and events throughout the year. You'll be spoilt for choice, whatever the weather. And since you can now camp on most unenclosed land in Scotland, we sum up the etiquette in our feature on 'wild camping', so that everyone can enjoy the experience equally. Whatever your style, *Cool Camping: Scotland* is all about the best places to camp – pure and simple.
